1 Policy Statement

The Board of Management of Inverness College UHI has adopted this policy for the management of risk at the College. This policy forms part of the governance arrangements of the University of the Highlands and Islands.

The current policy statements on risk were reviewed and agreed by the University Court on 20 September 2017. The College has adopted the statements:

The College's general approach is to minimise its exposure to risk. It will seek to recognise risk and mitigate the adverse consequences. However, the College recognises that in pursuit of its mission and academic objectives it may choose to accept an increased level of risk. It will do so, subject always to ensuring that the potential benefits and risks are fully understood before developments are authorised, and that sensible measures to mitigate risk are established.

1.2 Overview and Scope

Risk is inherent in all activity. Risk management is important to ensure that all significant, relevant risks are understood and prioritised as part of normal management practices. Information on risk must be organised in a way that is useful for management purposes and enables decisions to be taken based on the knowledge of risk versus reward.

Identification and management of risk on a consistent, appropriate and timeous basis is a requirement of the University Court, as regional Strategic Body, and of the Scottish Funding Council (SFC).

The recognition and management of risk is the responsibility of everyone who allocates and/or uses resources so all members of staff should have an awareness of the risks of the organisation.

1.3 Implementation and Monitoring

The policy will be implemented through the Senior Management Team (SMT) of the College. A report comprising the corporate/high level risk register will be presented to the committee of the SMT and to the Board of Management Audit Committee for review and monitoring at each meeting.

2 Legislative framework/related policies

- 2.1. Health and Safety Policy
- 2.2. ICT - UHI Partnership Information Security Acceptable Use Policy
- 2.3. Data Protection Policy
- 2.4. Financial Regulations
- 2.5. Data Protection Act 1998
- 2.6. UK General Data Protection Regulation
- 2.7. Business Continuity Plan.

2 Overview

Risk is inherent in all activity. Risk management is important to ensure that all significant, relevant risks are understood and prioritised as part of normal management practices.

Information on risk must be organised in a way that is useful for management purposes and enables decisions to be taken based on the knowledge of risk versus reward. Identification and management of risk on a consistent, appropriate and timeous basis is a requirement of the University Court, as regional Strategic Body, and of the Scottish Funding Council (SFC).

4 Scope

The scope of this policy was initially developed to apply to faculties and departments of Executive Office and also to create a model of good practice methodology that could be adopted by Academic Partners. The College, as an integral part of the University, has adopted the policy to cover all aspects of its activity and operations.

5 Risk Appetite

The College will take a portfolio approach to risk management: i.e. whilst at any one time it may be carrying a high level of risks in one or more parts of its business, it will ensure that the number of areas exposed to high risk at any time are minimised and balanced with a low risk approach in other areas.

The portfolio of risk will be regularly reviewed by the SMT, Audit Committee and Board of Management.

High risk areas will be very closely aligned to strategic priorities and aligned to high returns i.e. the College should not be exposed to high levels of risk if returns are likely to be minimal or if the activity is not business critical.

The elapsed time over which the College is exposed to a high level of risk in

any area should be minimised as much as possible.

6 Partnership Approach to Risk management

The University uses a standardised risk template and this has been adopted by the College. The template and the methodology for recording risks was developed and agreed through the Finance Directors Practitioners Group and the process for completing and sharing risk registers was endorsed by Academic Partners Principals.

The criteria for measuring the likelihood of risks occurring and the gross impact of risks is attached at Appendix 1.

7 Roles and Responsibilities

7.1 The Director of Finance is the policy owner.

The recognition and management of risk is the responsibility of everyone who allocates and/or uses resources, so all members of staff should have an awareness of the risks of the organisation.

Risks need to be evaluated in a controlled manner and the uncertainties involved need to be minimised. The approaches available to managing risk include:

- Terminate – avoid risk by doing something else
- Transfer – risk passed on to someone else e.g. outsourcing, insurance, subcontracting
- Treat – reduce risks by management action
- Tolerate – accept risk and manage appropriately

7.2 Board of Management

The Board of Management has a fundamental role to play in the management of risk. Its role is to:

- Set the tone and influence the culture of risk management within the institution. This includes determining the risk appetite of the institution, i.e. determining what risks are acceptable and which are not, and to provide a framework within which the appropriate level of exposure to risk can be determined in particular circumstances; and
- Approve major decisions affecting the College's risk profile or exposure.

7.3 Finance and General Purposes Committee

The Finance and General Purposes Committee is responsible for:

- Ensuring that the major risks associated with specific proposals put to it have been properly considered and can be appropriately managed within the policy framework set by the Board.

7.4 Audit Committee

The Audit Committee is responsible for monitoring the College's general arrangements for risk management and specifically for:

- Ensuring that corporate risks are properly managed, reviewing evidence to this effect and ensuring measurement of results as appropriate.
- Advising the Board on the effectiveness of policies and procedures for risk assessment and risk management;
- Annually reviewing the College's approach to risk management and, if appropriate, recommending changes or improvements to key elements of its processes and procedures;
- Providing a statement to the Board annually indicating how the College has complied with good practice with regard to Corporate Governance and, in particular, in relation to effective risk management.

7.5 Role of Internal Audit

A "risk based" internal audit plan is prepared taking account of the College's risk register, strategic plan and wider operating environment.

The College aims to progress towards "risk managed" which is defined as "Enterprise approach to risk management developed and communicated".

Internal audit will:

- Report its findings to the audit committee
- Advise and make recommendations to senior managers as appropriate.

7.6 Senior Management Team

The Senior Management Team is responsible for:

- Implementing the Board's risk management policy and ensuring compliance
- Identifying, evaluating and managing strategic and operational risks in the College and bringing emerging corporate risks to the attention of the Board and/or its committees.

- Ensuring that everyone in each SMT member's area of responsibility understands their risk management responsibilities making clear the extent to which staff are empowered to take risks.
- Communicating College policy and information about the risk management programme to all staff and external partners as appropriate

IMPACT					
5 - Catastrophic	5	10	15	20	25
4 - Major	4	8	12	16	20
