UHI | INVERNESS

Student Work Experience Programme (SWEP)

Repair Café Project Team – Full Overview

Be part of a student-led project to explore and develop a future Repair Café initiative at UHI Inverness. Working together, you'll research successful schemes, investigate training and equipment requirements, identify potential funding opportunities, and help create a plan for launching events in the future.

With staff acting as mentors and guides, you'll have the opportunity to take ownership of a real sustainability project from concept to proposal. This is a chance to contribute to reducing waste and promoting a circular economy while developing valuable transferable skills in research, project planning, teamwork, communication and problem-solving.

Staff Lead	Health, Safety & Sustainability Manager
